**Thursday, 20. 10. 2016,**

We discussed the creation of a webpage for the program and Natasa started working on it using Wordpress. She established the main page and some subpages. We advised her with themes and subtitles.

We discussed the lack of a slogan for our project and decided to have a contest using Tricider. Maria created the voting poll and will add the 3 suggestions per country till the mid of November.

The screenshot shows the Tricider website interface. At the top, there is a navigation bar with the Tricider logo and a user profile for "Maria Theodoridou". Below this, the main content area features a poll titled "Which slogan do you like the most?". The poll description states: "Our project 'Through artistic abilities to developed basic skills' needs a slogan to be set in our webpage. There will be 12 suggestions coming from the 4 participating schools - 3 from each. Be creative and have fun." To the right of the title, it says "23 days left" with a "change deadline" link. Below the description, there are buttons for "Share and Invite" and "Subscribe to updates". The poll area is divided into three columns: "Ideas", "Pros and cons", and "Votes". The "Ideas" column currently shows "No ideas yet..." and a green "Add idea" button. A blue arrow points to the button with the text "Be the first to propose an idea!". At the bottom of the page, there is a "More options" section. The browser's address bar shows the URL "www.tricider.com/admin/3EpuYr4tIV3/6n0YqX2LU07". The Windows taskbar at the bottom displays various application icons and the system clock showing "16:28" on "2016-10-23". A security notification "Intrusion Detected (IDS)" is visible in the bottom right corner of the taskbar.
